People need trees, trees need people...

Root Anchor

[Download page as PDF](#)

The Arbortech root anchoring kit is supplied complete. The unique harness design enables the effective anchoring of most sized container grown root ball.

- A single individual can quickly and easily install the Arbortech Root Anchor without the need for special tools.
- The Arbortech Root Anchor is suitable for medium to heavy soils. In lighter friable locations, we recommend the additional use of optional ground stakes. These are simply hammered through pre drilled holes to provide additional stability.
- As with all tree planting projects, care should be taken to ensure that no underground services are interfered with.

Optional ground stakes

A planting involving 200 litre trees at [Westonbirt Arboretum](#) using the Arbortech Root Anchor.
